EMPOWERING **YOUR SUCCESS** DAILY

Why **Choose Us**

The company started its operations in 1973 and nowadays this organization **boasts for more than 50 years of experience** in design, manufacturing and supply of products

for Oil & Gas, Petrochemical, Energy, Gas Processing fields and Pharmaceutical.

From May 2023, Officine Metalmeccaniche Vibonesi S.r.l. **OMV** has acquired the full control of CMC S.r.l.

About Our Company

In our production facility, with the best in class production technologies, we realize different types of heaters for refineries, air coolers heat exchangers, shell and tube heat exchangers, pressure vessels, waste heat recovery units, prefabrication of coils

and piping, pig tails, skids prefabrication and assembly, electric and instrumental component installations, tanks, stacks, ducts, thermal incinerators, transfer lines, derricks and heavy structural work.

Our production capacity is roughly 200.000 hours/year and about 400 tons/month of

structural work carbon and stainless steel.

About Our Team

With the Customer always at the center of our activities and Customer satisfaction as goal, our Management and the entire

team are capable to understand Customer expectation and deliver an excellent level of service in terms of Quality, Time and Cost.

Company Certification

Our Quality System is certified to the internationally **recognized standards ISO 9001**, and the entire Company operates

according to the most modern concepts codified in our Quality manual and procedures.

EN ISO 9001:2015

EN 1090-1:2009+A1:2001

ISO 3834-2:2005

The following ASME certifications: U2, U, S, National Board and FITOK IT 18-010 HT are being obtained and will be added as soon as issued.

We have launched a voluntary ISO 14001 and ISO 45001 certification project, to adopt the

best environmental management and occupational health and safety management practices.

Engineering & Design

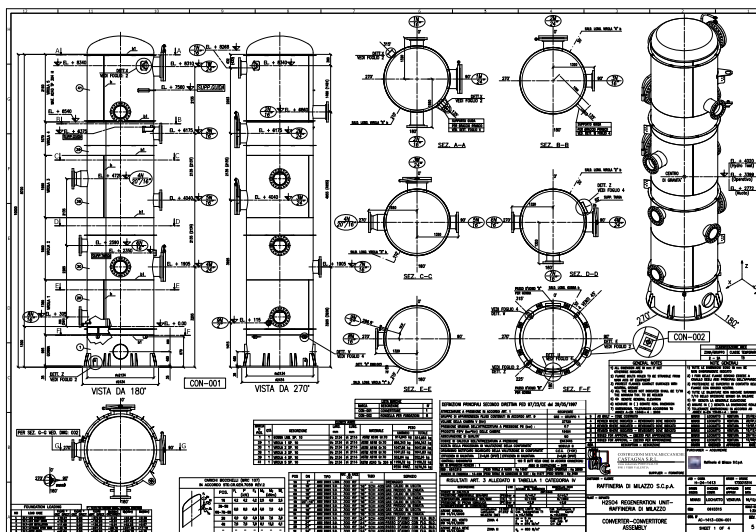

Our team of engineers and technicians is capable to design equipment as per specific customer requirements and international codes and standards.

We support the customer in the engineering of the industrial product starting from calculation with the aid of specific software solutions such as PVElite®, Passat®, IDEA StatiCa® and so on, up to final design and construction drawings, with the latest 3D software such as Tekla Structures®, Advance Steel® and AutoCad®.

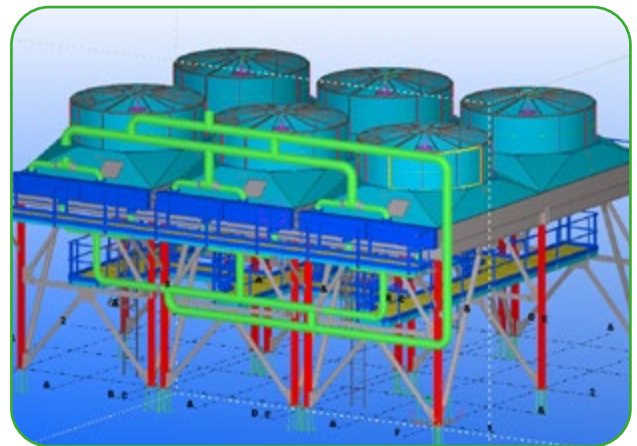

Our production engineers support the industrialization of production processes,

guaranteeing quality through standard production and assembly procedures, making the processes sustainable.

Our team can manage industrial projects, from the feasibility study of the product to the CAD design of the components up to realization, starting from basic process data or data sheet.

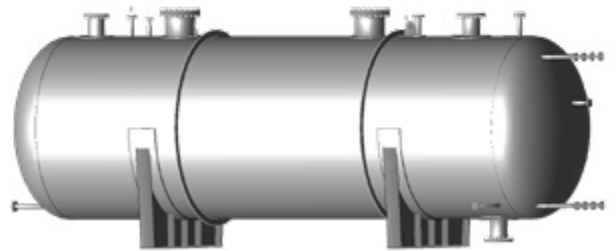

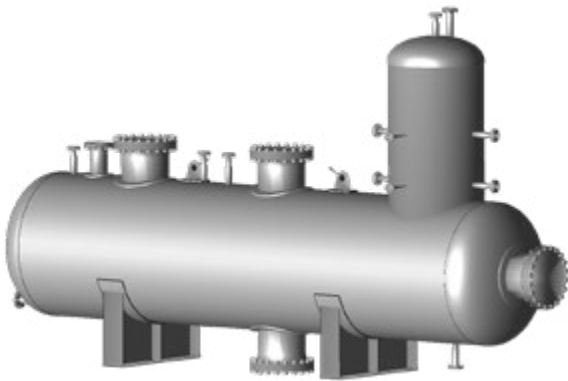

Engineering Design **Air Coolers**

Project: Garraf 3 Oil Trains - No.3 Air Cooler Heat Exchanger
Client: Progetti Europa & Global Spa
Site: Iraq

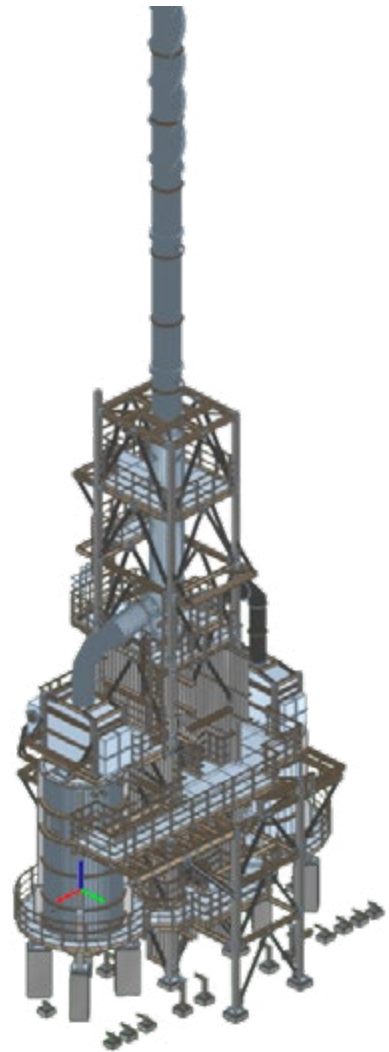

Engineering Design Vessels

Project: Lukoil Vessel (Example of Vessels: Absorber Inlet Separator 83-V-0306 / Lean Accumulation Drum 34-V-2104)
Client: Kt Kinetics Technology
Site: Kstovo Refinery, Russia

Engineering Design Heaters

 **Fabrication**

 **Testing and Treatments**

Heaters | Furnaces

- Cylindrical heaters with top convection and stack.
Coil material CS / SS / LA / Duplex / Ni Alloy with straight or spiral tubes - up to diameter >8m; length >25m; weight >200T.
- BOX heaters with top convection and stack.
Coil material CS / SS / LA / Duplex / Ni Alloy with straight or hairpin tubes - up to width/height >7m; length >25m; weight >200T.

Vessels

- Atmospheric vessels material CS / SS / LA / Duplex / Ni Alloy up to diameter >8m; length >25m; weight >200T.
- Pressure vessels material CS / SS / LA / Duplex / Ni Alloy up to diameter >8m; length >25m; weight >200T.
- Steam drums material CS / SS / LA / Duplex / Ni Alloy up to diameter >8m; length >25m; weight >200T.

Waste Heat Recovery Unit

Coil material CS / SS / LA / Duplex / Ni Alloy - up to width/height >7m; length >25m; weight >200T.

Products and Services

Skids

Piping prefabrication material CS / SS / LA / Duplex / Ni Alloy.

Equipment and piping supporting skid base.

Electrical and instruments installation.

FAT Test and final preparation for shipment.

Heat Exchangers

- Shell and tube heat exchangers - material CS / SS / LA / Duplex / Ni Alloy up to diameter >4m; length >16m; weight >200T.
- Air coolers - material CS / SS / LA / Duplex / Ni Alloy.
- Headers for air coolers (Plug, Bonnet, Cover plate type) material CS / SS / LA / Duplex / Ni Alloy.
- Automatic or manual recirculation systems.

Vaporizers for LNG

- SCV type (Submerged combustion vaporizers)
- ORV type (Open Rack Vaporizer)

Steel Stacks Ducting

- Steel stacks in CS / SS up to diameter >7m; length >25m; weight >200T for each module.
- Accessories (Damper, Venturi expansion joints, etc...)
- Air and FG ducting.

Tanks (API 650 / 620 etc)

- Tanks, shop fabricated CS up to diameter >8m; length >25m; weight >200T.
- Tanks, field assembled in CS / SS / LA - All diameters.

Columns | Flares

- Columns without internals
- Columns with internals
- Flare stacks

Reactors

- Reactors
- Thermal Reactors

Other Exchangers

- Convection banks.
- Boilers
- Steam generators
- Steam condensers
- Desuperheaters / Quench fittings
- Air heaters/coolers (granulation)
- Double pipe heat exchangers

*Material CS / SS / LA / Duplex / Ni Alloy - up to width/height >7m; length >25m; weight >200T.

Machinery and Equipment

We have best-in-class Machinery and Equipment as the Automatic CNC single spindle drilling lines for sections equipped with a 6 positions automatic tool changer and a non-contact laser.

A Finning department is equipped with an High Frequency Finning Machine able to produce solid and serrated finning tubes with a diameter from 1" to 8" and up to 22 mt. in length and a Finning machine

for applied fins (g-fins, l-footed, etc.). An investment project is in progress to expand the production capacity for applied and an extruded machines.

Equipment	Capacity/Model
Gantry Type Milling and Drilling Workstation	1200 X 4000 Mm
Gantry Type Milling and Drilling Workstation	1200 X 4000 Mm
3 Axes Manual Milling Machine	1200 X 4000 Mm
Milling And Drilling Workstation With Mobile Bench	1200 X 4000 Mm
Automatic Cnc Single Spindle Drilling Line	15000 Mm
Heater For Post Weld Heat Treatments (20 Burners 160 Kw Each)	6000 X 6000 X 18000 Mm
Heater For Post Weld Heat Treatments	1000 Kw
Burner For Dryout	1700 Kw
Plasma Cutting Xpr 260 Xd	14000 X 2500 X 40 Mm
Plasma Cutting Ht2000	12000 X 2500 X 40 Mm
Bending Machine	Futura 400/70 - 14500 X 12 - 1200 Ton
Rolling Machine	3000 X 40 - 2000 X 8 Mm
Cutting Machine	Maxima 60/10 - 6000 X 15 - 3200 X 5
Tube And Profiles Bending Machine	Ar 110/180 - 4" /10"Max
Tube And Profiles Bending Machine	Ar 110 - 4" Max
3 Axis Cnc Tube Bending Machine	3" Max - Raggio 50 Min.
Submerged Arc Welding Machine With Guides And Harm	1000 Ah
Submerged Arc Welding Machine Double Head	2 X 1000 Ah
Submerged Arc Welding Machine For Internals	Braccio Lg > 3000
High Frequency Finning Machine	Min 1" Max 8" Lg 22000
Equipment For Local Pwht By Resistance	Da 6 A 24 Canali
Cranes	140, 40, 20 And 12 Ton
Bridge Cranes	4x10 Ton + 2x16 Ton + 2x32 Ton
Refractory Anchors Machine	
Sandblasting Boot	7000 X 7000 X 16000
Rolling Machines	Cs-1000

Transportation and **Logistics**

We can manage FOB and/or any kind of delivery to different destinations thanks to our skilled logistics team and the strategic logistics position.

Smart Delivery

The geographical position of our company is strategic and functional. In fact, we are just a few minutes away from the most important European goods sorting hubs.

Port of Vibo Valentia

The port of Vibo Marina is affected by commercial flows strictly connected to the productive activities and industrial settlements present in the territory of the Vibo Marina province. It specializes in the distribution of petroleum.

International Airport of Lamezia Terme

Lamezia Terme International Airport (IATA: SUF; ICAO: LICA), also known as Sant'Eufemia Airport, is the main international airport serving Lamezia Terme in Calabria (Italy).

Port of Gioia Tauro

Located in the heart of the Mediterranean, Gioia Tauro is the largest transshipment terminal in Italy and one of the most important traffic hubs container in the Mediterranean basin. It has 5130 meters of docks and the port yards have a total area of approximately 1 million and 800 thousand square meters

The port of Vibo Valentia Marina is located in the southern part of the Gulf of S. Eufemia, it is protected to the west by an elbow breakwater and to the east by a two-arm breakwater pier completely quayed (Generale Malta quay and Molo Cortese). Inside the port basin there are various docks (Fiume, Tripoli, Bengasi, Papandrea and Buccarelli) intended for both commercial, military and recreational operations. From the root of the "Generale Malta" quay towards the "Fiume" quay there are various floating piers intended for pleasure boats.

Incoming commercial traffic is mainly made up of fuels and gas destined for coastal depots and factories in the Vibo Marina area, while outgoing traffic is essentially represented by industrial products from the neighboring industrial area.

In addition to commercial activities, within the port there is a significant movement of pleasure boats that use essential services, such as reception and refueling. This movement in the summer period reaches high levels of attendance and represents an important aspect for the provincial tourism sector.
